

Knowledge Organiser Pupil Assessment

Pupil: _____ **Class:** _____ **Date:** _____

Key Question 1: What do the lines of longitude and latitude mark?

Answer in full sentences:

Longitude and Latitude are angles. A pair of numbers made up of one of each describes the location of a point anywhere on the earth's surface. Some maps have lines of longitude and latitude marked on them.

Key Question 2: How long does it take for the Earth to rotate and what effect does it have?

It takes the earth 23 hours and 56 minutes to rotate once around its axis. The earth orbits the sun once a year and then moon takes approximately 28 days to orbit the earth. The rotation of the earth rotates us through sunrise, midday and sunset.

Key Question 3: How does GPS work?

The Global Positioning System (GPS) is a system of 24 satellites that all work together to create an exact view of earth. Using advanced technology they compare one location to a grid of numbers and then find a location with a great degree of accuracy.

Key Question 4: Can you write a question to further your knowledge of this topic?

Answer in full sentences:

How would you know if a country is in the northern or southern hemisphere?
